

INTERMITTENT POLY BAG MACHINE

flexo X
THE FLEXIBLE
ALL-ROUNDER

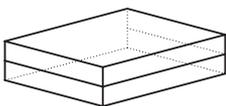

flexo X

The name says it all. This film packaging machine scores with maximum versatility. Frozen pizzas, biscuits, fruit and vegetables, books, skis, laminates, paint rollers, etc., you are instantly equipped for any kind of application with this machine – daily changing orders, for example. The flexo X features a side-sealing unit. The transversal sealing unit is designed as an intermittent version and processes a wide range of films, dimensions and products.

HIGHLIGHTS

- High film savings due to processing of very thin films from 7 µm
- Reliable and robust side seals for any type of film
- Extremely quick adaptation without tools
- Data from formulations already run stored for repeat jobs
- Simple user guidance via touch screen; ability to store temperature settings for transversal sealing and side sealing
- Path control for reproducible format and performance settings
- High efficiency thanks to fast and simple film exchange; controlled winding of remaining film strip outside with soft start to prevent film from tearing
- Maximum serviceability and maintainability thanks to perfect access and numerous maintenance-free components

TECHNICAL DATA

Product infeed	manual as standalone/automatic in line
Film	PE, PO, biofilms, centre-folded film and flat film
Product size	L: from 45 mm, W: 10 – 450 mm, H: max. 250 mm, Optional: L: 40–∞ mm
Operation	intermittent
Capacity	up to 6.000 cycles/h
